- Waviness is the measurement of  
the more widely spaced  
component of surface texture. It is  
a broader view of roughness  
because it is more strictly defined  
as "the irregularities whose  
spacing is greater than the  
roughness sampling length".

... - Don't quote me 'cause it was  
done just before I started here but  
I think our format was based very  
closely on Y14.1 which I don't  
think has the notes in the format.
